Web Technologies	HTML5, XML, CSS, JavaScript, jQuery, Angular
Operating Systems	Windows, Linux/UNIX, Mac OS
Testing Tools	JUnit
Databases/Tools	Oracle, MySQL, SQL
Build Tools	Maven
Methodologies	Agile, Waterfall
Cloud Computing	AWS, EBS, EC2, S3, RDS
Logging Tools	Log4j

## **Professional Experience**

### **Cognizant Technologies**

July 2022 – October 2023

Role: Software Engineer – Java Developer

Responsibilities -

- Responsible for development and sustainability architecture for e-commerce applications utilizing both front-end and back-end technologies such as Java, SpringBoot, SQL, Javascript, AWS.
- Participated in Agile [SCRUM] meetings with teams and triaging with third-party vendors.
- Used JavaScript for client-side validations in the JSP and HTML pages, as well as to design and form user registration layouts.
- Worked with updating components and utilized Core Java methods in code-base environment.
- Experienced in AWS Clouds services to work with containers and Spring dependency injections as well.
- Utilized SQL technologies for creating and adding database queries and CRUD operations.
- Documented work and updates via Confluence page for tutorials, diagrams, and flowcharts for peer developers and IT for guidance or FAQ.
- Collaborated with other developers on designing, developing, testing, and implementing new web features, HTML pages, and documentation updating and presenting.
- Implemented new features and resolved bugs and user account errors and exceptions handling.
- Participated in peer-reviews and development with teammates for solution designs and related code.
- Splunk admin troubleshooting experience to diagnose the root of failure for Dashboards and Data onboarding via index and field extraction per user error.
- Worked with integration of Amazon Web Services with other applications infrastructure.
- Wrote and maintained build scripts for E2Open cloud platform SaaS applications modules like supplier services and admin portal using Maven.
- Worked with Third-party applications and clients in meetings and reports for any updates or ideas brought of development team, triage is called if error depending on what third-party application is.

### **ClassBoxes Technologies**

Jan 2019– June 2022

Role: Consultant - Java Software Developer

Responsibilities -

- Worked with the development of E-commerce applications for banking clients.
- Built Java web applications utilizing HTML, CSS, Angular, Node.js, Core Java, SpringBoot, RestAPI and AWS Cloud technologies.
- Created and innovated flow chart documentation for peer developers in Confluence pages.

- Backend development using Spring, SpringBoot, Rest API, and AWS Cloud services.
- Front-end development using technologies such as Html, CSS, and Angular to create page layouts and features for e-commerce-based applications.
- Communicated with third-party vendors and applications any updates or issues with programs and established triage calls across directories in Confluence pages.
- Familiarity with codebase and running test, scripts, building and working with pipelines such as Jenkins.
- Working with Rest Api's consumption task and CRUD operations for client or user request.
- Building and testing layouts for web applications and pages.
- Creating Admin dashboards and marketing dashboards for clients increasing marketing rep sales for users registered, and the number of user submissions made.
- Working with API tokens for admin authentication and cloud services.

## **LCP Tracker**

September 2018 – January 2019

Role: Technical Support Specialist

Responsibilities -

- Assisted customers and clients with how to use UI on application.
- Worked with payroll software application which assisted clients with tracking their payroll data.
- Attention to detail when assisting and performing mathematical calculations to ensure payment and information is correct.
- Escalating certain designated issues to tier 2 support when necessary and utilizing Salesforce.
- Run computer maintenance (Virus scans, Malware checks, Updates, Disk checks, Defragment)
- Troubleshooting computers to fix Hardware/Software issues.
- Install new software and peripheral devices, such as monitors and keyboards, as well as motherboards and Hard drives as needed.
- Responding quickly, courteously, discreetly and accurately by phone, fax or mail.

## **Education**

### **Computer Software Certification - Advanced Software Development**

University at Phoenix - Completed Certification C/o 2022

### **Bachelors in Science, Criminal Justice**

State University of New York at Fredonia – Graduated C/o 2018
